Making things happen

### Background

The X'mas bazaar is one of the highlight events of "Explore the Joy of Science", a weekend public event aiming to arouse interest on science of the general public. Hong Kong Science and Technology Parks Corporation (HKSTPC) offers a number of science workshops to inspire creative thinking and knowledge of the target audience (family segment with kids aged from 4-12).

Similar weekend public events had been held starting from 2013 and received positive responses. Approximate 2,000 pax flow was counted every event day and generally audiences would stay in the Park for around 4hrs/visit.
